TRUCKING

ADVANCED MAINTENANCE PROGRAM

This is a lease program that has a purchase at the end of \$5,000 - \$30,000.

The Advanced Maintenance Program (ARP) is designed to help owners who are leasing a truck that may run out of manufacturer's warranty during the lease.

There are 2 separate deductions for maintenance related issues:

1.) The owner is required to set up the ARP escrow account with a deduction of \$.05 per mile and must continue to contribute this amount until the balance reaches \$3000.00. If at any time the balance drops below this (i.e. purchases tires etc.). The \$.05 per mile deduction will start again until it reaches \$3000. This deduction will always run even after they get to \$3000 and it is up to the owner to stop the deduction by contacting IEL. If stopped, once the balance falls below \$3000 it will start up again. This account is used for routine maintenance, repairs not covered, deductibles on large repairs etc.

2.) The second deduction is the cost of the ARP coverage. This deduction is based on the current mileage of the truck. This cost starts at \$.07 per mile until the truck reaches 500,000 miles. After 500,000 miles the deduction will increase \$.01 for every 100,000 miles. See the example below.

| MRP Mileage Band | MRP Deduction |
|--------------------------|----------------|
| 500,001 to 600,000 miles | \$.08 per mile |
| 600,001 to 700,000 miles | \$.09 per mile |
| 700,001 to 800,000 miles | \$.10 per mile |

All Services must be approved in advance by the Advanced team and all repairs must be done at Advanced Trucking, LLC approved locations, unless otherwise approved by Advanced Team.

- Towing will not be covered by this program.
- B service is fully covered as long as it is performed between 45,000-51,500 miles from the previous B service.
- There is a 20% deductible on large repairs (Engine, Transmission, Clutch, Drive Axle)
 - For example: \$10,000 repair on engine – Owner pays \$2000 from his \$3000 escrow account, then MRP pays \$8000.
- There is no deductible for items like fuel pump, steering components, cooling system, A/C etc. These will be covered by the ARP.
- Not covered at all: Batteries, front or rear engine seal, ABS, Interior items like cabinet handles, wind noise, upholstery etc.
- Available Trucks: 2014-2019 Freightliners
- Miles: Generally, the miles will be between 350k-700k Miles
- Cost will vary but will generally be between \$35-\$60K
- Payment will vary but in the range of \$325-\$495 per week.
- No Excess mileage will be charged during this lease.

Lease and Purchase with Confidence! With Advanced Trucking, LLC new ARP program you don't need to worry about running out of warranty. Whether you are an experienced owner-operator or new to the game, we have the lease program for you.

The new Maintenance Repair Program is designed to protect your truck once the manufacturer's warranty runs out. It covers routine maintenance as well as large repairs. So, you can run without the fear of having a breakdown that might break the bank. 31/2 year lease terms, low payment and an affordable buyout at the end.

- Freightliner leases with an option to purchase
- Payments of \$325-\$595 per week
- Buyout at the end of the lease \$5,000-\$30,000 Deductible is 20% on large repairs
- No deductible on small repairs like fuel pump, cooling system, *NC*
- B service covered (if completed within required mileage guidelines)
- Shop locations across the US for you to get the work done Mandatory
- maintenance account contribution of \$0.05 cpm required.

**REPAIRS
COVERED
UNDER
ADVANCED MP**
REPAIRS COVERED (Not
deductible to customer)

Air Conditioning / Heating

High and low pressure cutoff switches,
Temperature control programmer
computer,

Axles

Axle hub bearing,
Axle shafts,
Bearings,
Bushings,
Carrier case,
Gear sets,
Leaf springs
Spindles,
Suspension leveling; valve,
Wheel drive wheel seals,

Steering

Center link
Drag link
Idler arm,
Pitman arms,
Power steering pump.
Steering gear box,
Tie rods,

Interior/ Exterior

Dome light assembly.
Glove box latch,
Hood hinges,
Hood release cable/latch,
Passenger door hinges,

Cooling System

Cooling fan assembly
Fan clutch,

Brakes

Brake valve,
Computer module/control processor,

Electrical

Alternator,
Brake light switch, horns,
Cruise control module,
Electric mirror motors,
Electronic digital instrument cluster,
Electronic ignition computer, control
module,
Engine compartment wiring harness
Fuel gauge sending unit,
Headlight switch

Ignition crank sensor
Ignition lock cylinder and switch
Instrument panel printed circuit board,
Mechanical switches,
Power door lock actuators
Power window motors,
Regulators,
Starter motor and drive
Starter solenoid,
Trip/mileage computer and module,
Turn signal switch,
Voltage regulator,
Window washer pumps,
Windshield wiper motor (including
internal circuit board, delay switch, and
relay)
Wiper switch,

Fuel Delivery System

Electric fuel supply pump,
Fuel injection pump,
Fuel pressure regulator,
Fuel tank,
Fuel timing actuator,
Metal fuel delivery lines,

COVERED**
(20% With Deductible)

Clutch replacement
Complete driveshaft system
ECM
EGR/DOC/DPF
Engine
Rear End
Transmission
Turbo

Engine

Camshaft and bearings,
Connecting rods,
Crankshaft, and crankshaft pulley,
EGR cooler,
EGR valves,
Engine oil cooler,
Exhaust intake valves,
External:

- Fly wheel
- Fuel injector,
- Harmonic balancer,
- Intake and exhaust manifolds,

Oil pan,
Oil pump gears and housing,
Pistons, and piston rings,
Pushrods,
Rocker/cam followers,
Rod and main bearings,
Timing gear housing and cover,
Timing gears,
Turbo actuator,
Valve covers, lifters, and springs,
Water pump

Transmission

Bearings,
Bushings,
External transmission cooler unit,
Gear sets,
Main shaft,
Overdrive unit,
Shift forks,
Spacers,
Synchronizers,
Synchronizing drum and gears
